George Milad Aziz

Full-Stack Developer

Cairo, Egypt — Military Status: Exempted — (+20) 1225841430 — george.milad2@gmail.com — GitHub — LinkedIn — Portfolio

Objective

Full-Stack Developer with experience building scalable React applications and AI-integrated full-stack systems with TypeScript, Node.js, and MongoDB. Passionate about performant, production-oriented web applications.

Work Experience

HITS Solution Company **Aug 2024 – Sep 2024**
Software Developer Intern *Cairo, Egypt*

- Developed foundational skills in SQL, including database creation, table relationships, joins, aggregate functions, date operations, views, and user-defined functions.
- Built and tested a small ASP.NET MVC project using C#, database migrations, connection strings, and relational data models, with introductory exposure to REST APIs, HTTP methods, and status codes.

Projects

SmartMove — Enterprise AI Real Estate Analytics Platform | *Grad Project, A+* ***July 2026*** | **GitHub: SmartMove**
Sole frontend engineer for a SaaS platform analyzing real estate markets in Dubai, Egypt, and England & Wales, built on a 34M+ row Azure Data Warehouse. Built 60+ React/TypeScript components with a custom UI system and delivered 3 AI features: a RAG assistant, a CSV analytics engine, and an agentic multi-agent SQL pipeline streaming via WebSockets. Integrated Power BI (Dubai) and built custom Chart.js/Leaflet.js dashboards (Egypt, England & Wales) from Python-preprocessed JSON. Collaborated on 45+ Django REST endpoints with JWT auth and 4 role-based portals.

- Tech Stack: Next.js, React, TypeScript, Python, Django REST Framework, PostgreSQL, Azure SQL, Azure Blob Storage, Pusher, LangChain, Gemini AI, Power BI, Chart.js, Leaflet.js

RestaurantHub — Online Restaurant Ordering System | *ASP.NET Core MVC* ***Sep – Oct 2026*** | **GitHub: RestaurantHub**
Built an online ordering platform with customer and admin portals using ASP.NET Core MVC and SQL Server. Designed a 6-entity EF Core schema with Identity-based role authorization; implemented admin management, session cart checkout, server-side pricing, order workflows with audit history, IDOR protection, paging, and custom request logging and exception handling middleware.

- Tech Stack: C#, ASP.NET Core MVC, Entity Framework Core, SQL Server, ASP.NET Core Identity, LINQ, Middleware, Bootstrap

ProjectMonitorAI — Agentic AI Project Management Platform | *2026* **GitHub: ProjectMonitorAI**
Built a full-stack platform featuring an autonomous AI auditor, real-time Kanban synchronization, and role-based access control. Engineered a resilient 4-tier multi-model fallback pipeline utilizing an 11-function Gemini AI tool registry to dynamically query live metrics. Secured backend APIs with 24-hour background crons, private Pusher channel authorization.

- Tech Stack: Node.js, TypeScript, Express, MongoDB, Pusher, Google Gemini AI, Joi, Vercel Serverless

TechMart — AI-Powered E-Commerce Platform | *April 2026* **GitHub: TechMart, Live: TechMart**
Built a full-stack e-commerce platform with 38 REST endpoints, 5 database models, and 50+ React components across 15 unique views. Architected dual AI assistants (consumer + admin) powered by a 12-function Gemini tool registry, alongside JWT auth, OTP recovery, rate limiting, and real-time cart synchronization.

- Tech Stack: React, TypeScript, Node.js, Express.js, MongoDB, RTK Query, Tailwind CSS, Google Gemini AI

Technical and Soft Skills

Frontend: React.js, Next.js, TypeScript, Redux Toolkit, RTK Query, Tailwind CSS, Material UI, Bootstrap
Backend: Node.js, Express.js, C#, ASP.NET Core MVC, EF Core, MongoDB, PostgreSQL, SQL Server, JWT, ASP.NET Identity, REST APIs
AI & Systems: Agentic AI, Gemini Function-Calling, WebSockets, Real-time Systems, Serverless Architecture, Prompt Engineering
Tools: Git, GitHub, Postman, Swagger, Figma, Vercel, Azure (SQL, Blob Storage), Visual Studio
Concepts: State Management, Authentication, Role-Based Access Control, MVC Architecture, Dependency Injection, Middleware Pipeline, API Integration, Responsive Design, Rate Limiting

Education

Dual Degree Program: Canadian International College (CIC) & Cape Breton University (CBU) | **GPA: 3.89** **2022 – 2026**
-Bachelor of Business Technology — Canadian International College (CIC) *Cairo, Egypt*
-Bachelor of Technology Information (Information Systems Management) — Cape Breton University (CBU) Nova Scotia, Canada

Courses

Front-end Developer (JSB Upskilling Academy, Route Academy) | Node.js Fundamentals (Upskilling Academy)
